

SS Great Britain, Bristol.

Celebrating the innovative buildings, transport and technology that helped shape the modern world.

Since 1994 we have awarded over £660million to 1,700 industrial, maritime and transport projects across the UK.

We want to help more people conserve their local industrial heritage and pass on skills to younger generations.

What do we support?

Projects we fund include:

- printing presses
- pumping engines
- windmills
- historic ships
- locomotives
- natural landscapes transformed by industry

Project ideas

Our funding could help people:

- uncover and record people’s memories of our industrial past
- give a disused site a new purpose
- restore and maintain operating machinery
- reveal the history of industry in your area
- explore the nation's network of canals
- provide staffed visitor facilities and learning resources
- help young people learn new skills and care for their heritage

See the stories and projects below for more inspiration.

How to get funding

If you have an idea for a project, we would love to hear from you.
