

Data for Heritage Places - Place Analysis Mapping of Measures

This document accompanies the raw data spreadsheets used by the National Lottery Heritage Fund in our [Data for Heritage Places research](#). The aim of this document is to list the raw data used, the source of that data and explain additional calculations carried out as part of the analysis. This document was updated in 2025 to reflect changes made to the index ahead the use of the index to help select the second set of Heritage Places.

Ref.	Factor	Unit of measurement	Source	Description (for calculated measures)	England	Wales	Scotland	Northern Ireland
2.1	Heritage Condition - Weighted Score	Value per local authority area	Calculated measure	The indexed score for Heritage Condition in 3.8 is multiplied by the weighting shown in the contents page.	In Scope	In Scope	In Scope	In Scope
2.2	Other Funding - Weighted Score	Value per local authority area	Calculated measure	The indexed score for Other Funding in 3.9 is multiplied by the weighting shown in the contents page.	In Scope	In Scope	In Scope	In Scope
2.3	Deprivation - Weighted Score	Value per local authority area	Calculated measure	The indexed score for Deprivation in 3.10 is multiplied by the weighting shown in the contents page.	In Scope	In Scope	In Scope	In Scope
2.4	Previous Heritage Fund investment - Weighted Score	Value per local authority area	Calculated measure	The indexed score for Previous Heritage Fund Investment in 3.11 is multiplied by the weighting shown in the contents page.	In Scope	In Scope	In Scope	In Scope
2.5	Weighted total	Value per local authority area	Calculated measure	The Weighted Scores in 2.1-2.4 are added together to provide the total score which is then ranked within each nation to produce the final index.	In Scope	In Scope	In Scope	In Scope

Table 3: Indexed and Weighted Data - Heritage Condition - Indexed Domain Scores

Ref.	Heritage Condition Domain	Measure	Unit of measurement	Source	Description (for calculated measures)	England	Wales	Scotland	Northern Ireland
3.1	Historic Built Environment - Indexed	Indexed value of Historic Built Environment total domain score	Value per local authority area	Calculated measure	The local authority area with the highest value for the total domain score is allocated 100, the lowest value is allocated 0, other local authority areas are allocated values relating to where they sit on the scale between those values. Where indicated and where there are large outliers, indexing is against a percentile value rather than the highest value to prevent outliers limiting the range of values between 0 to 100.	In Scope, Indexed to 99th percentile	In Scope, Indexed to highest value	In Scope, Indexed to 95 th percentile	In Scope, Indexed to highest value
3.2	Museums, Archives and Artefacts - Indexed	Indexed value of Museums, Archives and Artefacts total domain score	Value per local authority area	Calculated measure	The local authority area with the highest value for the total domain score is allocated 100, the lowest value is allocated 0, other local authority areas are allocated values relating to where they sit on the scale between those values.
